EDUCATION:

Grinnell College, Grinnell IA **c/o 2027**

B.A in Computer Science, B.S in Electrical Engineering (3-2 engineering program), NCAA student-athlete (soccer), merit aid recipient, co-founder of Grinnell Student Outreach Club

Fenwick High School, Oak Park IL **c/o 2024**

Lawless Scholar merit aid recipient, strong background on Math Team – 6th in Illinois individually and 1st as a team, participation in WYSE (worldwide youth in science and engineering), National Merit semi-finalist, 1500 SAT, 35 ACT.

PROFESSIONAL EXPERIENCE:

ADB Companies, Chicago IL **May 2026 – Aug 2026**

Engineering Intern (software/electrical)

- Went on numerous site visits with state of Illinois licensed electrical engineers to get hands-on experience at telecommunication and fiber optic sites. Also tasked with reviewing engineering drawings from Verizon, AT&T, and T-Mobile
- Worked individually on data cleaning and organization using Python and Microsoft Excel. Also implemented a web page to host site data for members of ADB based in St. Louis to use

Grinnell College, Grinnell IA **Aug 2025 – May 2026**

Residential Assistant (RA)

- Responsible for planning, organizing, and budgeting events for my 20-person floor
- Trained for conflict mediation, supervisor communication, emergency management, and policy enforcement

ACE Handyman Services, Chicago IL **May 2025 – Aug 2025**

Software Development Intern

- Created and implemented a website in JavaScript that serves as a tool to produce and store estimates for our field manager and craftsmen. None of Ace's competitors currently offer live time estimates, and this website is currently in use and allowing Ace to differentiate their estimate process. Used FireBase database services, JavaScript, CSS, and html to develop this site.
- Created and implemented a second website in JavaScript that allows workers to check tools and vehicles in and out.

Tapster Robotics, Chicago IL **Oct 2024 – Jan 2025**

Robotics Assembly Team

- Responsible for the assembly of roughly one-hundred robots with a small team where we used our attention to detail, communication, and problem-solving skills to ensure a high-quality final product and a quick turnaround.

PROJECTS & EXTRACURRICULAR:

SQrL VPN **Aug 2026 –**

Founder

- Worked in a team of three Grinnell College computer scientists to create a Rust backed mesh VPN using WireGuard protocol for network tunneling with SQL handling persistent data storage.

Grinnell Student Outreach Club **Jan 2025 –**

Founder

- I am responsible for analyzing areas of rural Iowa that need help reconstructing houses, or general outreach and then finding a way to get our club involved. Currently have about one-hundred and thirty members with the hopes of growth and lasting impact

SKILLS:

Programming languages / computer design: C, JavaScript, R, Rust, SQL, Python, Java, circuit design, computer architecture

Computer software / frameworks: LLM implementation, AI frameworks, Git, Excel, Bash, Microsoft Office

General: Project management, good organization and time management, hard worker and a fast learner
